# WHAT IS A POWER BANK?

**A** Powerbank is a portable charger for your mobile devices. It is an absolute necessity if you are a frequent traveler. You absolutely need to be able to charge your devices if you want to fully utilize them on a single trip. Cell phones, tablets, etc., all require power after some time and a power outlet is generally not always available anywhere.

Powerbanks come in different charging capacities. They differ according to how long your hand held devices can be fully charged. The main use of this device is to ensure that we have an available power source in emergency situations.
